

1970-1981 2nd Gen F-Body Control Arms
RK100-21

Alignment recommendations

	Caster	Camber	Toe In	Caster Pill	Camber Shim
Daily Driver	+4.5°	-.5°	.25°	#1	0-.125"
Weekend Warrior	+5.5°	-1.0°	.5°	#2	.25"
Track only	+6.0°	-2.0°	.5°	#2	.375"+

NOTE:

These values are rough estimates only. Due to the large production tolerances and wear with age, every car will require slightly different shims and caster pills combinations to reach the desired alignment spec. In some instances, each side of the same vehicle may require different caster pills, or camber shims to achieve the same alignment value.
